

Table 5A. Profile of Clients by Type of Funding Support

This table provides a summary of clients by Medicaid coverage. Since the focus of the reporting is on clients of the public mental health service delivery system, this table focuses on the clientele serviced by public programs that are funded or operated by the State Mental Health Authority. Persons are to be counted in the Medicaid row if they received a service reimbursable through Medicaid.

Please note that the same person may be served in both Medicaid and Non-Medicaid programs during the same reporting period.

<input type="checkbox"/> Data based on Medicaid Paid Services <input checked="" type="checkbox"/> Data Based on Medicaid Eligibility, not Medicaid Paid Services <input type="checkbox"/> Data are Duplicated																												

Comments on Data (for Age):	
Comments on Data (for Gender):	
Comments on Data (Overall):	

Each row should have a unique (unduplicated) count of clients: (1) Medicaid Only, (2) Non-Medicaid Only, (3) Both Medicaid and Other Sources funded their treatment, and (4) Medicaid Status Not Available.
If a state is unable to unduplicate between People whose care is paid by Medicaid, then they should report all data into the People Served by Both Medicaid and Other Sources and would check the box, People Served by Both is a duplicated count.
